DETAILED ACTION

Election/Restrictions

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 13 are, drawn to a pressure-sensitive adhesive composition based on (co)polymer of acrylic acid or methacrylic acid, derivatives of acrylic acid or methacrylic acid, or combination thereof, classified in class 525, subclass 78 and 89.
 - II. Claims 7-10 and 14, drawn to a process for preparing the pressure-sensitive adhesive composition by free-radical polymerization, classified in class 525, subclass 263.
 - III. Claims 11-12, drawn to an adhesive tape comprising a substrate=film and backing material of a pressure-sensitive adhesive composition, classified in class 428, subclass 355 AC, 355 R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made

by another and materially different process such as a solution polymerization in the presence of Ziegler-Natta catalyst.

3. Inventions of Group I and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

An adhesive composition having outgassing properties in the claims of Group I can be used as a sealing material for an electronic parts.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to William Gerstenzang on May 29 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
